**NICE RECOMMENDATION FOR TREATMENT OF VARICOSE  
VEINS (GUIDELINES CG 168)**

- Use duplex ultrasound to confirm the diagnosis of varicose veins and the extent of truncal reflux, and to plan treatment for people with suspected primary or recurrent varicose veins.

**Interventional treatment**

For people with confirmed varicose veins and truncal reflux:

- offer endothermal ablation
- if endothermal ablation is unsuitable, offer ultrasound-guided foam sclerotherapy
- If ultrasound-guided foam sclerotherapy is unsuitable, offer surgery.

**3-STAGE TRAINING PROGRAMME**

In response to the NICE recommendations and to increasing demand, Wessex Scientific is organising a 3-stage training programme for vascular surgeons and supporting healthcare workers:

- Vascular ultrasound courses
- Endovenous laser therapy course
- On-site assistance in establishing an EVLA service in UK hospital unit.

**EVLA TRAINING COURSE**

Training in venous surgical procedures of the lower limb veins including ultrasound guided simulation and live demonstration of endovascular laser ablation, foam sclerotherapy and avulsion techniques.

- Ultrasound equipment controls
- Ultrasound imaging in surgical procedures
- Practical workshop sessions
- Opportunity to train on EVLA simulation using a limb phantom
- Laser safety training and accreditation
- Live demonstrations of EVLA in theatres

### PRACTICAL SESSIONS

The workshops will be available for delegates to gain supervised training and practical experience in ultrasound guided EVLA simulation using limb phantoms and training in endovenous laser ablation procedures in theatre.

### SCIENTIFIC PROGRAMME

- 09.00 Welcome and Introduction
- 09.05 *Practical workshops I: EVLA - live cases/Ultrasound Imaging*
- 10.00 *Practical workshops II: Live cases/Ultrasound Imaging*
- 11.00 Refreshment break**
- 11.15 *Practical workshops III: EVLA simulation*
- 12.30 Lunch**
- 13.00 Laser safety training/certification Stanley Batchelor
- 14.00 *Practical workshops IV: EVLA - live cases/Ultrasound Imaging*
