

The VeinCare Team and Wessex Diagnostic are pleased to announce a new collaboration to provide live and interactive training on the practical aspects of performing venous procedures under local anaesthetic

This one-day course covers:

- how to set up your treatment room
- ultrasound image optimisation – “knobology”
- preliminary vein mapping
- vein access under ultrasound guidance
- the Seldinger technique
- endovenous catheter and laser positioning
- administration of tumescent local anaesthetic
- adjunctive procedures such as phlebectomy and foam sclerotherapy
- demonstrations of Microsclerotherapy for Leg Telangiectasias
- working as a team
- NICE Clinical Guideline CG168
- practice using phantoms and ultrasound

This course is aimed at consultants and higher trainees in vascular surgery as well as other members of the team such as theatre nurses, vascular technologists and ultrasonographers.

In line with guidance from the National Institute of Health and Care Excellence – Guidance CG168 – we recognise that venous conditions should be treated by specialist teams.

This course is particularly suited to group attendees who can learn together as a team and identify their individual learning needs.

Not only does the course provide demonstrations in our treatment rooms but we provide training and certification in laser safety and an opportunity to gain hands on experience of ultrasound guidance on simulators.

This course provides 6 CPD credits in accordance with the CPD scheme of the Royal College of Radiologists.

After attending this course, we can arrange a bespoke training programme for you and your team in your own clinic.

Course Programme

Actual Times and Content may vary slightly from course to course

08.30	Welcome and Introduction
08.30	Setting up the treatment room
09.00	Endovenous Laser Treatment, Ultrasound Guided Foam Sclerotherapy and Phlebectomy in treatment room
10.30	Demonstration of Microsclerotherapy Phantoms and Ultrasound Cannulation
11.30	Endovenous Laser Treatment, Ultrasound Guided Foam Sclerotherapy and Phlebectomy in treatment room
14.00	Lunch and Laser Safety Lecture (with certificates)
15.00	Demonstration of Microsclerotherapy Phantoms and Ultrasound Cannulation
15.30	Endovenous Laser Treatment, Ultrasound Guided Foam Sclerotherapy and Phlebectomy in treatment room
17.00	Q + A, Course Feedback forms
17.30	Course Close

Course Directors

Miss Catharine McGuinness	Consultant Vascular Surgeon
Dr Haroun Gajraj	Consultant Vascular Surgeon
