COURSE INFORMATION

This one day course provides a introduction to Obstetrics imaging as a tool to assess the well-being and anatomy of the mother and foetus. The combination of lectures, scanning demonstrations and practical workshops give a comprehensive start for those new to the field.

Who should attend this course?

It is aimed specifically for medical professionals who are new to the field and have little/ no scanning experience.

Structure

Initial lectures and associated workshop will cover the three main ultrasound modalities, where the emphasis will be on familiarisation and manipulating equipment controls to optimise image and signal quality.

Our leading faculty will then introduce Obstetrics imaging and specialisms, provide supervised individual scanning guidance in small groups and answer any questions.

Practical 'hands-on' workshop sessions

The workshops are an opportunity for the delegates to gain supervised training and practical experience on live models. An exhibition of the latest ultrasound systems, provides the workshop space where delegates can practice on a range of machines.

Venue and accomodation

[Hallmark Strathallen Hotel, Birmingham, UK](#). We have negotiated reduced room rates for delegates. Please contact T: +44 (0)330 028 3410 and mention the course.

PROVISIONAL SCIENTIFIC PROGRAMME

9 AM: Ultrasound equipment controls and optimizing image quality

Basic principles of ultrasound imaging

Pulsed Doppler/colour Doppler techniques

Practical Workshop Session I: Equipment controls

Image Optimisation

Introduction to 2D Obstetrics imaging

Practical workshop II: 2D Obstetrics imaging

LUNCH

3D/4D Obstetric imaging: tips and tricks

Case studies

Practical Workshop III: 2D/3D/4D Obstetric imaging
