

INTRODUCTION TO ULTRASOUND IMAGING /or 2/3/4d OBSTETRICS IMAGING for GPs and medical professionals

Saturday 6th June 2020
Birmingham, UK
One day parallel course

6 CPD credits

in accordance with the CPD Scheme of the
Royal College of Radiologists.

OVERVIEW

This parallel one day course provides a combination of lectures, scanning demonstrations and workshops to provide a comprehensive introduction to ultrasound imaging.

The initial lectures cover the three main ultrasound modalities, where the emphasis will be on familiarisation and manipulating equipment controls to optimise image and signal quality.

Parallel Sessions:

- 1) Vascular deep vein thrombosis (DVT) investigations, Emergency medicine FAST, Musculoskeletal (MSK).
- 2) Introduction to 2D Obstetrics imaging
3D/4D Obstetric imaging: tips and tricks
Case studies

PRACTICAL 'hands-on' WORKSHOPS

An exhibition and workshops of the latest ultrasound systems, will be held throughout. During the workshops delegates gain supervised training and practical experience in the use of Doppler ultrasound techniques in scheduled sessions within the programme.
